

“Helping Dogs with People Problems”

“I work with dogs every day and bring 20 years experience to every training session and every private consultation. I have the ability to see the world from your dog's point of view and my powerfully positive methods achieve results. I use a pack-orientated philosophy. My services are recommended by breeders, pet shops and veterinary clinics throughout the Auckland area and the majority of my clients come to me through referrals”.

My aim is to teach dog owners how to see the world from their dog's point of view and to understand how the dog's mind works. The more you learn about dog psychology, the better you will be able to connect, train and enjoy your canine companion.

I will teach you how to gain the respect of the dog that he would naturally give to his pack leader in the wild. Dogs need a calm, assertive and confident pack leader who will make all the rules and set all the boundaries.

Teaching people to understand that their dog is not a four legged human in a fur coat, and that it does not have any human emotions is the hard part, tricks and obedience training is the easy part of what I do.
